Corvallis, OR | (541) 286-2789 | vachanthambi1999@gmail.com | linkedin.com/in/vachanthambi | vachanthambi.github.io

## Profile

Analytics professional with 2+ years turning SQL, Python, and BI dashboards into measurable cost and efficiency wins for finance and operations stakeholders; available immediately. M.S. in Business from Oregon State University, skilled across Excel, Power BI, Anaplan, SAP ERP, and Oracle EPM, with a track record of building ETL pipelines, forecasting models, and AI-powered analysis tools.

## Professional Experience

### Oregon State University

Oct. 2024 – Jun. 2026

*Student Assistant – McNary Student Center*

- Reconciled 200+ point-of-sale transactions totaling \$1,500-\$2,000 per shift at end of day in Excel, validating cash, credit, and alternate tender entries against system totals and delivering a verified daily close-out to the back office manager.

### Colt Technology Services India Private Limited

Oct. 2022 – Jul. 2024

*Analyst | Finance, Reporting & Analytics*

- Developed scenario-based forecasting and long-range planning models in Anaplan, Python, and Excel on 3+ years of historical demand, reaching 91.9% forecast accuracy and unlocking \$200K+ in annual savings through capacity and procurement timing.
- Consolidated data from 5+ source systems into automated SQL and Python ETL pipelines, cutting manual reporting effort by 40% and enabling daily rather than weekly refresh of executive dashboards for Finance and Operations leadership.
- Performed monthly variance analysis across 3 business units on \$500K-\$1M in revenue, gross margin, and operating cost actuals versus forecast, delivering root-cause commentary to Finance leadership and BU heads 48 hours ahead of quarterly close.
- Reconciled forecast and consolidation data across Oracle FCCS/PBCS and internal databases under audit-ready mappings and control documentation, uncovering a dormant vendor billing 2 years post-deactivation and surfacing \$1.2M+ in recoverable spend.
- Built Power BI KPI frameworks with custom DAX measures tracking revenue, gross margin, and service delivery, adopted as the standard pre- and post-billing cycle review tool and cutting analysis turnaround by 30% for Finance leadership.

### Campus Hyre

Aug. 2021 – Dec. 2021

*Analyst Intern*

- Built Python and SQL pipelines aggregating multi-source data, saving 15 hours weekly and improving processing efficiency by 35%.
- Replaced manual Excel dashboards with live Power BI, adding validation and automated refresh, cutting errors per cycle by 30%.

## Projects

### AI Finance Ops Copilot | Python, PostgreSQL, Claude API, Multi-Agent Systems, Streamlit

- Architected a multi-agent LLM system on the Claude API with tool-restricted specialist agents, reconciling 2,866 transactions across three heterogeneous PostgreSQL-modeled systems (CRM, ERP, Billing) with no shared join key, resolving customer identity through RapidFuzz fuzzy matching and classifying all 65 seeded defects by root cause with zero unexplained residual.
- Designed a driver-based variance engine decomposing 24 months of modeled budget-to-actual data into volume, mix, price, and FX components under a code-asserted reconciliation identity, isolating a \$2.7M offset concealed by a +1.3% headline variance.

### Automated DCF Valuation Analyzer | Python, Claude API, Streamlit, Plotly

- Engineered a Python valuation engine computing WACC via CAPM and projecting 5-year free cash flows via the Gordon Growth Model, validating intrinsic value through a 30-scenario sensitivity grid built from 6 WACC and 5 terminal growth rate assumptions, then cross-checking the result against 4 industry peers on EV/Revenue, EV/EBITDA, and P/E multiples sourced through **yfinance**.
- Deployed the model as an interactive Streamlit dashboard with live assumption sliders, Plotly sensitivity heatmaps, and one-click Excel and PDF export, valuing Tiffany & Co. within 96% of its actual acquisition price for under \$0.05 per run.

### Belly Library Management System | SQL, Python, Power BI, DAX

- Authored 10 advanced analytical SQL queries using CTEs, window functions (RANK, LAG, rolling 3-month averages), and conditional aggregation to surface overdue tracking, member delinquency rankings, monthly borrow trends, and reservation fulfillment by category, feeding a Python export pipeline that produced 7 normalized CSV files for downstream Power BI ingestion.
- Built a 3-page Power BI dashboard with 18 visuals and custom DAX measures spanning operations KPIs, member analytics, and inventory health, surfacing 61% availability, \$171K in fines, and 44% reservation fulfillment across the generated dataset.

## Core Skills

**Programming, Analytics & BI:** SQL (CTEs, Window Functions, Optimization), Python (Pandas, NumPy, scikit-learn), ETL Pipelines, PostgreSQL, Database Design, Data Modeling, Power BI (DAX), Tableau, Excel (Advanced, Power Query, INDEX-MATCH, VLOOKUP, PivotTables), PowerPoint, Dashboard Development, KPI Design, Multi-Agent LLM Orchestration (Claude API), GitHub, AWS (Cloud Practitioner).

**Financial Analytics & Platforms:** Forecasting, Long-Range Planning, Variance Analysis, Financial Modeling, Monthly Close, Financial Reporting, Revenue & Cost Analysis, Gross Margin Analysis, DCF & Valuation, Audit-Ready Documentation & Controls, Financial Data Governance & Mappings, SAP (ERP), Anaplan, Oracle EPM (FCCS, PBCS).

## Education

### Oregon State University

Sep. 2024 – Jun. 2026

*M.S., Business (Financial Analytics) | GPA: 3.62/4.0*

*United States of America*

### Visvesvaraya Technological University (CMRIT)

Aug. 2017 – Jul. 2022

*B.E., Electronics and Communication Engineering*

*Bengaluru, India*

## Certifications

AWS Certified Cloud Practitioner, Amazon Web Services | Aug. 2026
